

**Kusondra King**  
**Division of Air Quality, NC Department of**  
**Environmental Quality**

Kusondra King is as an Environmental Engineer in the Attainment Planning Section of North Carolina’s Division of Air Quality (DAQ). Kusondra holds a Bachelor’s degree in Environmental Resources Engineering from Humboldt State University in California. Since joining DAQ in 2016,

Kusondra has focused on developing base and forecast year criteria and hazardous air pollutant emissions inventories to support State, Regional, and National air quality planning. She was the project manager for the preparation of North Carolina’s Greenhouse Gas (GHG) inventory, which was recently released to the public in January 2019. Kusondra also frequently works with the State Energy Office on addressing specific directives under Governor Cooper’s Executive Order 80. She has given multiple presentations on the development of a GHG inventory report and climate resilience and hazard mitigation planning.
